As long-haul Truck Drivers, We depend on the XM weather and traffic service, it is hard to know where to turn in each city for the local stations across the U.S. and then if you find a local station it is a long wait between weather or traffic situations to be reported. With XM's service, We get this every minute of the day or night and it's immediate information, We pay for this service and don't think that the National Association of Broadcasters should be able to dictate what we listen to. My Wife and I urge You at the FCC to reject the NAB's petition 04-160 and not let someone dictate whether I can have this service. We in the Trucking Industry have come to rely on being able to get these updates without having the problem of being close enough to a local station to pick it up, and it gives Us time to re-route if there is a traffic problem or adverse weather conditions in a certain area. Please, consider Our voice in this matter, Respectfully,

Mike & Julia Truver
